### The Company of Craftsmanship

Mitsuoka Motor is the company of craftsmanship, luxury and elegance, where timeless classic cars are created with soul and passion. Founded in 1968 by Susumu Mitsuoka, whose vision was to create cars that expressed spirit and individuality and share them with the World.

Every step in our Japanese based factory is carried out by skilled master craftsmen - there is no automated production line. Inspired by our founders philosophy, they work with their hands breathing passion and energy into every car they produce.
